

# Build This Grand Old-Timer!

U. S. ARMY BIPE IS ALL-TIME FAVORITE. Rakish lines and snappy color make the "Hawk" as beautiful in looks as in performance. Use CO2, rubber, half-A motors. Loads of detail, all reliably accurate, make it deceptively realistic when displayed or flown.

**\$3.00**

## CURTISS HAWK P6-E

### CHOOSE THE BEST — CHOOSE CLEVELAND EVERY TIME

Cleveland-Designed flight-engineered, super-detailed kits come in all sizes and prices, for all uses. Space restricts full description of these fine models. You can't go wrong when you buy from the oldest "same management" model aircraft kit manufacturers in the world. Our 30 years of designing assures good flying results! Ask old-timers about C-D's! Send 5c or two 3c stamps for very latest illustrated catalog.

F-80 SHOOTING STAR

GRUMMAN PANTHER

PIPER CUB

LUSCOMBE SEDAN

LUSCOMBE SILVAIRE

RYAN NAVION

### SIMPLE SCALE FLYERS

These easy-to-make models can be flown with many different motors — rubber, CO2, 1/8A, (and Class A for control line). They are not too large for indoor exhibition models, being 30" span except the 24" "Minnow", and are impressively real. They are flight-engineered.
